Research Lab ELICO - Équipe de recherche de Lyon en sciences de l'information
et de la communication

Description of the Host Research Lab

The ELICO research team structures its work around three conceptual pairs: Discourse-representations, Norms-institutions and Knowledge-documents. These axes enable a critical analysis of infocommunicational processes, taking into account the material and symbolic dimensions of media devices, as well as the political, economic and social contexts of communication. The team also

insists on the ethical responsibility of research and reflexivity regarding its impact on the partners involved.

Research Project

DemoCIS – Democracies, Citizenship and Institutions facing the transformations of public Spheres

Description of DemoCIS – Democracies, Citizenship and Institutions facing the transformations of public Spheres

As a partner of DemoCIS, a 7-year project laureate of the France 2030 Programme on Social Sciences and Humanities, within a Consortium led by University of Lille, and including Grenoble Alpes University, CY Cergy Paris University, Sciences Po Saint-Germain-en-Laye, Sciences Po Grenoble, Science Po Lille, as well as CNRS, Institut Mines-Telecom and Inria, Jean Moulin Lyon 3 University co-leads the Axis 3.3, « Acting against the polarization of societies and information disorder: information and knowledge transmission : Countermeasures to informational disorder ».

The DemoCIS project aims to explore the changes and challenges facing democracies in a context of rising abstention, mistrust of institutions, polarisation of societies and information disorders. It aims to respond to these challenges through interdisciplinary approaches, integrating democratic innovation, exploration of new spaces for citizenship, fight against polarisation, and the strengthening of the rule of law.
