*Note-taking is authorized - and highly recommended! - for all sections of the test*

# Reading Section

- Assesses how well you can read and understand the kind of materials used in an academic environment
- 3–4 reading passages
  - Passages are approximately 700 words long
  - Each passage is followed by 10 questions each
  - Passages are excerpts from university-level textbooks that would be used in introductions to a discipline or topic
  - Passages cover a variety of subjects, but all of the information you need to answer the questions is contained in the passage; you don't need to be familiar with the topic of the passage
- Glossary feature available to define words not commonly used

# Listening Section

- Measures your ability to understand conversations and lectures in English
- Includes listening for basic comprehension, listening for pragmatic understanding (speaker's attitude and degree of certainty) and connecting and synthesizing information
- Conversations and lectures use campus-based language
  - 3–4 lectures; some with classroom discussion
  - 2–3 conversations with 2 speakers

# Speaking Section

- Measures your ability to speak English effectively in academic settings
- Tasks resemble real-life situations students might encounter during class as well as outside the classroom
- Test takers respond by speaking into a microphone
- Responses are captured by the computer and sent to ETS for scoring
  - 4 speaking tasks based on academic topics and campus situations
    - 1 independent task
    - 3 integrated tasks
  - 15 to 30 seconds of preparation time before each response
  - Response times are 45 and 60 seconds

# Writing Section

- Measures your ability to write in English in an academic setting.
- You must be able to present your ideas in a clear, well-organized manner.
- Two writing tasks:
  - 1 integrated
    - Listen to a short lecture and read a passage
    - 20 minutes
  - 1 independent
    - Response based on personal experience or opinion
    - 30 minutes
- Responses are typed using computer keyboard.

# The *TOEFL*® Test Provides Truly Fair and Unbiased Scoring

- The Reading and Listening sections are scored by computer; the Speaking and Writing sections are scored by human raters plus an electronic scoring engine.
- Each section receives a score from 0 to 30; the section scores are added up to a total score from 0–120.
- There are no unfair *TOEFL*® test centers, because tests are not scored there. Tests are only scored through a centralized scoring network.
- The Speaking section uses multiple human raters who do not know test takers' identities. This prevents the bias that can occur in other tests that use a face-to-face interview with a single rater.
- Universities know they can evaluate applicants fairly using TOEFL scores.
